

Corporate Fact Sheet

Established:	Carticept Medical, Inc. is a privately held medical device company headquartered in the northern Atlanta suburb of Alpharetta, Georgia.
Financing:	Carticept has raised \$23 million to date, primarily from two of the nation's premier medical device venture capital firms, Domain Associates and New Enterprise Associates.
Mission:	Carticept is dedicated to improving the quality of life for patients with osteoarthritis or cartilage damage through the development, manufacturing and marketing of innovative medical devices.
Disease Overview:	An estimated 27 million Americans suffer from osteoarthritis, a chronic degenerative joint disease characterized by the breakdown of the joint's cartilage. Many people do not respond well to current medical treatments or are not eligible for major surgery such as a total joint replacement.
Cartiva™ Synthetic Cartilage Implant	Cartiva, made from a proprietary biomaterial, was developed to replace worn-out cartilage surfaces. The damaged cartilage is cored out and replaced with Cartiva to provide a smooth, load-bearing joint surface. In use since 2002, Cartiva is cleared for sale in the European Union, Canada and Brazil and has been used in over 2,500 surgeries. Clinical trials are underway to support an application for marketing in the United States.
Navigator™ Delivery System	The Navigator Delivery System is a computer-controlled, infusion system intended to automate and improve the efficiency of fluid or medication administration. Carticept has filed for FDA clearance of its initial infusion device and expects to launch the system in 2010.
